### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a method for producing aluminum metal wherein an anode has grooves in the electro-active surface of an anode to drain away oxygen gas from an inter-polar room, wherein the anode has a plurality of anode teeth which define the grooves in the electro-active surface of the anode and these grooves are sloped in a longitudinal direction of the grooves and away from the cathode, when the cathode is in a substantially horizontal plane. Typical anodes used in the production of the aluminum are known to be sloped to drain away oxygen gas to a venting area between the anodes with the cathode being of the same slope as the anode, but does not teach a plurality of grooves within a single anode that directs the gas away from an inter-polar room when the cathode is in a horizontal position with relationship to the plurality of grooves as instantly claimed. Therefore, the instant invention is deemed novel. The electrowinning cell having the same structural features as in the method claims, therefore are also novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
